

Rockhampton
SANDS

Our Story

ROCKHAMPTON SANDS is the top choice for all your construction material needs.

Commencing operations in 2020 with a commitment to quality and customer satisfaction, we are proud to be a leading supplier in the industry to a growing clientele and some of the region's notable infrastructure and maintenance projects.

We understand the importance of reliable and high-quality materials for any construction project. Whether it be construction, industrial or residential, we are here to provide you with the finest sand and quarry products that will exceed expectations.

Our quarry is conveniently located at Fairy Bower, adjacent to the Rockhampton Ring Road and approximately 10 km from the Rockhampton CBD. The quarry is equipped with state-of-the-art machinery and a full fleet of extraction equipment. It is operated by a team of skilled professionals prioritising safety, quality and efficiency. We ensure that our mining practices are sustainable and environmentally responsible, minimising any negative impact on the surrounding ecosystem. This commitment to ethical and accountable practices sets us apart from others in the industry.

- Clearing and mulching of facilities
- Bulk supply of sand blends & quarry materials
- Bulk supply of sand blends & quarry materials
- Bulk supply of sand blends & quarry materials
- Offtake agreement (removal of Bottom Ash)

Our Products & Services

ROCKHAMPTON SANDS offer many options to suit your specific requirements.

RANGE

We offer a wide selection of materials, including sand grades (fine, medium, coarse, and bedding), and a diverse range of fills and aggregates. These products cater to various purposes, such as road, civil and building construction, maintenance, pre-mix concrete, landscaping, drainage, horse arenas, training rings, and playing fields. Regardless of your project's requirements, we have the perfect materials to meet your needs with top-quality results.

Our high-quality aggregates are sourced from rock formations that are carefully selected based on their density, strength, and durability. From gravel to crushed stone, we have the right aggregates to meet the demands of your project, no matter the size or complexity.

Additionally, we accept incoming concrete, asphalt, bricks and tiles. These materials are further processed and repurposed in aggregate blends.

Our Pledge

At ROCKHAMPTON SANDS, we take great pride in our commitment to customer satisfaction.

Our knowledgeable and professional team is always ready to assist you in choosing the right products for your specific needs. We understand that each project is unique, and we are dedicated to providing customised solutions that deliver the best results.

We value our relationships with our clients and strive to foster long-term partnerships based on trust and reliability. Our focus on exceptional customer service means we go above and beyond to ensure your experience with us is smooth and hassle-free.

From the moment you contact us to the delivery of your materials, you can expect nothing but excellence.

When you choose ROCKHAMPTON SANDS, you can trust that you are getting the industry's highest quality sand and quarry products. Our dedication to quality, sustainability, and customer satisfaction sets us apart.

CONSISTENCY

Our quarry boasts significant and consistent sand, clay, red loam, aggregates and construction water resources naturally occurring on site. All our products undergo rigorous testing to ensure they meet the highest standards of quality and consistency. No matter the project, we have the perfect solution for you.

AVAILABILITY

We have bulk availability of tested stocks of sand and clay on site, together with the ability to expand operations and increase supply capacity to meet customer needs.

CUSTOMISATION

At Rockhampton Sands, we customise materials for compliance with customer requirements and specific testing regimes for larger-scale projects.

CERTIFICATION

Rockhampton Sands is Dept of Transport & Main Roads QLD (DTMR) certified (Quarry Registration Certificate No. 2020-121) and can supply DTMR projects.

DELIVERY

We provide you with the convenience of choosing between an ex-bin collection or having your products delivered to your site. Our priority is to ensure prompt and reliable delivery of materials and construction water to our valued clientele. Rest assured, our well-maintained fleet of trucks, operated by friendly and experienced drivers, will ensure timely and efficient transportation. We offer maximum flexibility to meet your specific needs, including split loads, body loads, side tippers, truck and dog combinations of material, and body and semi-tanker loads of construction water.

ENVIRONMENT

Rockhampton Sands takes its commitment to minimising the environmental impact of our activities and products very seriously. We meticulously adhere to our Environmental Authority No EPPR00700213 to uphold responsible ecological management, promote sustainability, and protect the natural environment. Additionally, we utilise a customised Site Management Plan and a comprehensive Weed & Pest Management Control Plan throughout our operations.

SAFETY

Safety is paramount to us. While we are dedicated to consistently delivering services and high-quality products that meet and exceed customer expectations and project requirements, our top priority is ensuring a safe and healthy workplace for our personnel. We firmly believe that no job is so urgent that it cannot be carried out in a manner that prioritises safety.

Rockhampton Sands implements a stringent Production Quality Management Plan to guarantee our operations' safety. This plan oversees and improves the performance of extraction, wash plant, screening, stockpiling, and haulage operations in a safe and environmentally friendly manner. These comprehensive and coordinated quality control practices have been specifically designed to ensure compliance with customer specifications and our company requirements.

Moreover, we uphold high product testing standards by outsourcing the tasks to NATA-accredited laboratories. By doing so, we can have confidence in the accuracy and reliability of our product testing results.
